The all-absorbing topic in Congress is the presidential question. The extreme partizans are determined that neither justice or decency shall be accorded to the opposite party, but there may be discretion, wisdom and honor enough in both houses to effect a fair solution of the vexed matter.

THE WAY OUT.

The joint committee of the Senate and House have agreed upon a plan, for a fair and acceptable settlement of questions, relative to the presmatter. The bill provides just commission consisting of five be referred and decided upon. The bill to come up that will not be immediately disposed of by the commission. We will give the text of the bill next week.

The Democrats of the House are ransacking the telegraph offices for dispatches sent before and after the late election. They are striking for Z. Chandler, chairman of the Republican committee. The following are some of the dispatches which have been unearthed. They do not show any attempt on the part of Chandler to take any unfair means to carry the election, but they show that he intended to look after doubtful States, and see that they were not carried for Tilden by any false

New York, Jan. 16, 1877. The world usually takes upon itself the duty of criticizing the actions and the bequests of departed greatness, and its course respecting the dead Commodore forms no exception to this rule. Mr. Vanderbilt, true to his instinctive love for the acquisition and retention of power, following the English law of primogeniture in his will. far enough to leave at least five-sixths of his whole property to his oldest son, Wm. Quite a coincidence in connection with Mr. Vanderbilt's death at th great age of 83, was the death on the following day of his sister at the age of 85 years. Her disease took place at the old homestead on Staten Island and her funeral obsequies were held on the day following those of her brother.

In his Friday evening talk succeeding the death of the railroad king, Mr. Probabilities was wide of the mark Beecher considerable astonished when he announced Friday, that we hearers by saying some pretty severe things about the departed, which are seer has usually been so correct that we somewhat interesting as showing this have found it beneficial to regard his eminent divine's views on death bed repentance. New York Aquarlum continues to bear witness to the untiring energy and enterprise of its management through its steadily increasing popularity and attendance. People in this country have got so accustomed to exhibitions of animals that only the younger portions of the community can get up much enthusiasm over a menagerie, but here the most hardened sight seer experiences all the keen delights of novelty. We have all read Verne's "Twenty thousand Leagues under the Sea," and sighed with vexation to think that we could never enjoy the thrilling sensations of these fabulous navigations who walk at pleasure on the bed of ocean, and saw the wonderful teeming life of the depths as familiarly as we see that on the earth surface. But the miracle has been make to mase and now right have on Broadway, in this big, busy city, one can have in some respects even greater advantages than those envied passengers of the Nautilus. They had to wear their cumbrous diving dress, and could see but very little at a time, while the visitor to our Aquarium can in an hour's time behold the wanders of rivers, lake, arctic seas and tropical waters, and that without so much as wetting his

The Aquarium is a large, well lighted structure, eccupying the site of the iron 'Coliseum' (now in Philadelphia) on the corner of Broadway and 35th street. Once inside its broad portals, the visitor finds himself face to face with sights which, if he has a drop of fisherman's blood in his veins, will set it tingling about him, within easy reach were it not for the thick plate glass which protects them, he poised in lazy security such trout, pickerel and other game as he has only seen in dreams. How they wave defiance at him with their fanning fins and stare it at him out of their unwinking eyes! What would he give for a chance to throw a hook into clear waters! That an angler is aroused to such improper feelings by his first look at testify from personal experience; but these soon wear off and become lost in the intense interest which a further in-

spection awakens. swim some of the most interesting denizens of the ocean. Slowly traversing and retraversing the length of his domicile glides a shark, whose dull eyes, horrible half-open mouth and ghastly white belly hold the observer's gaze in a sort of shuddering fascination. Motionless, in the partial obscurity of the bottom of the tank, may be discerned the bony armor of an immense sturgeon. Up and down the sides of the glass walls travel with grotesque springs and wigglings, a small army of skates, surrounded by an amused crowd like that about a cage of menkeys, which indeed the long tails and antics of these queer flat-fish in some degree recall.

The two most recent additions to the collection are a queer looking unwieldy hippopotamus with a mouth like that of his own river Nile, and a marvelous Japanese fish with the eminently characteristic name of Kinglyo, having a body like burnished gold, and a long triple tail looking as though of white silk and fringed. This latter phenomenon is said to be the product of long years of patient culture.

So rapid has been the growth of the Aquarium since its opening in October that the proprietors have commenced the publication of an illustrated semirium Journal, full of interest and instruction, from the pages of which, for one dollar a year, all lovers of knowledge on such subjects can get both information and amusement. Gen. Nelson A. Miles, Colonel of the 5th infantry, has just returned after most successful campaign, with the ten ompanies of that regiment, against Sitting Bull and other hostile chiefs, who moved to the north of the Yellowstone iver in October last. The command numbered 439 men, marched over 600 miles in 45 days, and defeated Sitting Bull in three distinct engagements, driving him back utterly routed and damag ed to the Yellowstone river, which it is supposed he will cross and endeavor to form a junction with Crazy Horse, who is in the Big Horn country with an immense camp of hostile Cheyennes and Ogallalas. Gen. Miles was compelled to return to this post for supplies, but will within a week start again on the trail of the fugitive chief, and if possible prevent his junction with Crazy Horse, after which he will proceed, without returning to the cantonment, to attack the latter. Sitting Bull's force, which numered over 2000 lodges, and more than 000 well armed warriors, was completey routed and scattered. There is now out little doubt of his capture or surrender at an early date, if the transportation which is necessary for his pursuit, out which was nearly exhausted by the ecent campaign, will only hold out few weeks longer. The last fight with Sitting Bull occurred on the 18th, just on the head waters of Bad Water Creek. On that day, Lieut. Frank D. Baldwin, with a detachment of three companies of the Fifth Infantry, discovered and attacked his camp, and completely routed him. Lieut. Baldwin captured most of his lodges, a large number of ponies,
